

Weekly Question (9 Jan)

Level: P3

At first, Joy had 122 more stickers than Charity. After Joy gave away 500 of her stickers, Charity had 4 times as many stickers as Joy. How many stickers did Joy have at first?

Solution:

$$3 \text{ units} \rightarrow 500 - 122 = 378$$

$$1 \text{ unit} \rightarrow 378 \div 3 = 126$$

$$\text{Joy (at first)} \rightarrow 126 + 500 = 626$$

ANS: Joy had 626 stickers at first.
